

MICHAEL MAWUKO

Full-Stack & Frontend Developer

agbeyebiwomicheal@gmail.com · +233 54 728 8571 · Cape Coast, Ghana
Portfolio: agbeyebiawo.github.io/personal-portfolio | GitHub: github.com/Agbeyebiawo

Professional Summary

Full-stack and frontend developer with a BSc in Information Technology (University of Cape Coast) and an MSc in progress at KNUST. Passionate about building clean, fast, and scalable web experiences with React, Next.js, and modern JavaScript tools. Experienced in UI/UX prototyping, REST API design, microservices architecture, and shipping real applications used by real people. Available for projects and engineering roles.

Experience & Background

MSc Information Technology

Kwame Nkrumah University of Science and Technology (KNUST) Jan 2024 – Nov 2026 (in progress)

- Postgraduate research and coursework in advanced IT systems, machine learning, and network security.
- MSc thesis: Machine Learning Models for Network Vulnerability Severity Classification.

Teaching Assistant

University of Cape Coast 2023 – 2024

- Assisted with undergraduate courses in Information System Security and Discrete Mathematics.
- Supported lab sessions, grading, and student technical support for cohorts of 170+ students.
- Delivered hands-on guidance on software engineering principles, network security, and cybersecurity frameworks.

Frontend Developer Intern

AmaliTech Ghana May – July 2023

- UI/UX prototyping using Figma; engineered responsive web components in SCSS and React.js.
- Built invoice and tracking applications deployed to production within a professional delivery environment.
- Completed technical assessments across JavaScript, TypeScript, and responsive styling frameworks.

Technical Skills

Frontend Stack

React.js · Next.js · JavaScript (ES6+) · TypeScript · HTML5 & CSS3 · SCSS/SASS · Tailwind CSS · Vite · Redux

Backend & Databases

Node.js · Express.js · NestJS · REST APIs · PostgreSQL · MongoDB · MySQL · Redis · RabbitMQ · Firebase · PHP · Python

Developer Tools

Git & GitHub · Figma (UI/UX) · RESTful APIs · Netlify · Vercel · GitHub Pages · Technical Documentation

Featured Work

GwaiPro Music Web App

[Full-Stack](#) · [NestJS](#) · [PostgreSQL](#) · [Redis](#) · [RabbitMQ](#) · [Firebase](#)

A full-featured music industry platform connecting clients with musicians and studios. Built with NestJS microservices, PostgreSQL relational data models, Firebase push notifications, email verification, blog module, admin settings, and real-time chat with media support.

📄 gwaipro.com

Marketplace GH

[React](#) · [Vite](#) · [Tailwind CSS](#) · [In Development](#)

Mobile-first multi-role marketplace platform for the Ghanaian market. Features buyer/seller dashboards, status/shorts-style product content feeds, store following, promotional tools, and seller store management — built with a scalable component-driven React architecture across 5 screens: Home, Explore, Sell, Cart, and Me.

📄 [Live Demo](#)

Next.js Surveyor App

[Next.js](#) · [React](#) · [Netlify](#) · [SSR](#)

Modern land survey management tool engineered with Next.js for high performance and fast server-side rendering. Responsive design with dynamic data handling and clean dashboard UI.

📄 [magnificent-souffle-f267ae.netlify.app](#)

React Invoice App

[React.js](#) · [SCSS](#) · [State Management](#)

Invoicing application with full state management allowing clients to create, calculate, filter, and track invoices. Built during internship at AmaliTech and deployed to production.

📄 [Live Demo](#) 🔗 [GitHub](#)

Canvas Webpage Builder

[Vanilla HTML](#) · [CSS](#) · [JavaScript](#)

No-code drag-and-drop webpage builder built entirely in vanilla JavaScript on an HTML canvas — demonstrates deep DOM knowledge and a product mindset for building tools that empower non-technical users to compose layouts without writing code.

📄 [GitHub](#)

Interactive Comments Section

[JavaScript](#) · [DOM](#) · [LocalStorage](#) · [CSS3](#)

Full CRUD comment interface component complete with score counters, nested replies, and modal confirmations — built in vanilla JavaScript with LocalStorage persistence.

📄 [Live Demo](#) 🔗 [GitHub](#)

Education

MSc Information Technology

Kwame Nkrumah University of Science and Technology (KNUST) Jan 2024 – Nov 2026 (*in progress*)

Bachelor of Science in Information Technology

University of Cape Coast Sep 2019 – Aug 2023

Graduated with a BSc in Information Technology, focusing on software engineering principles, algorithm design, and database administration.
